

Meeting with client (January 26, 2026)

Concept: Self booking - appointment confirmation system

Pencil Booking 50% down payment

Google calendar API

OTP

Should be accessible through phone, laptop

Users should make an account before booking

Page 0: login and registration

Page 1: home (about, location, email, contact number)

- Make sure na maganda na kaagad, should be able to attract customers, will use placeholder pictures for now

Page 2: Guidelines in booking, rate, inclusion, house rules

- Given in yellow pad
- Fixed time only, no flexi time → only applicable during weekdays (for flexi time, client should call the owner and the owner will confirm on the system)

Page 3: booking + payment system

- Should include confirmation in both ends (customer & admin)
- Use notification - wag muna
- In case of accident, and client would cancel there would be a separate payment from the client for cancellation fee (php 2,000), and waiver for the refund (includes client information and reason for cancellation)
- Advanced booking
- 8-5pm and 7-5am

Page 4: data analytics

Page 5: comment (wag muna) - sentiment analysis (thesis)

Summary:

- For Software Engineering (baby thesis)
 - For the **payment system** use the process (send the **reference number** to the admin through email, then it will be checked in calendar to avoid double bookings)
 - *Upload screenshot ng payment, lagay reference sa website, send sa messenger yung reference number (manual confirmation muna) **reference number + name of account***
- For actual thesis (if passed as a thesis)
 - For the **comment section** it should be **visible to the owner only** but hidden from the clients
 - **Discount feature and special discount** will be added
 - For 1 booking = 22 hours; what if the client wants less than or more than 22 hours?
 - **Cancellation features** to be added here
 - **Promo** as well

Why leisure?

Reduce yung scam sa mga private resort

Risks:

Payment system
Double booking risk
